

# Closing conveyor HPL-KL

## Closing

Slicing

Packaging

Serving

Special

Semi-Automatic packaging line with a tab lock closing system. To combine with many different bread slicers for sliced bread or to combine with a stand-alone bagblower for easy opening and loading of unsliced bread, buns and rolls into pre-made wicket bags.

The bag blower ensures that the bags are opened, so that products can be packed quickly, and then closed on the conveyor with a tab lock closure. Also possible to close the bag with a closure with a label for a nice presentation of the product. This semi-automatic solution is a compact and solid slice- and packing solution for the semi-industrial bakery.
