Serveral

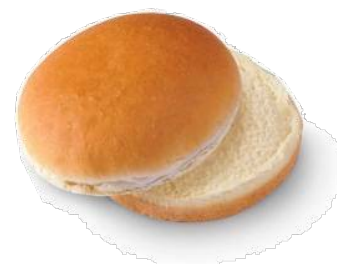

Special

Fully-automatic Bun Slicer for baguette, hamburger buns, cakes and rolls. This Bun Slicer is developed to slice the buns and rolls with a band blade totally through in two or three layers. The slice height can be adjusted with easy settings because of the position scales.

Effective enough for semi-automatic use but due to its design easy to install in any automatic system. The machine is completely constructed to the client requirements from a basic design and many variations therefore can be delivered. Simple to use, optimum protection and ease of cleaning make this machine most worthwhile.

- HOBA -
 Customised slicing, packaging and closing machines

Slicer HSC-BL

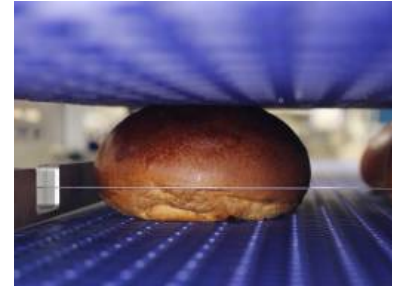

Features
