## Special

Fully-automatic Bun Slicer with disc (round blade) for hinge slicing of buns and rolls. It is possible to slice from the side or the top. The slice depth and height can be individually adjusted with easy settings because of the position scales.

Effective enough for semi-automatic use but due to its design easy to install in any automatic system. The machine is completely constructed to the client requirements from a basic design and many variations can therefore be delivered. Simple to use, optimum protection and ease of cleaning make this machine most worthwhile.

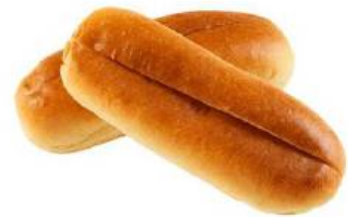

# Slicer HSC

## Features

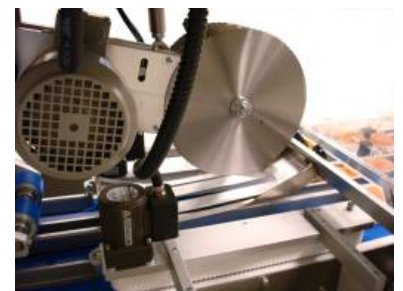

- Infeed and outfeed of the products with a conveyor belt, width 200 mm and length 2500 mm (can be customised)
- The circle blade is directly attached to the axle of the motor

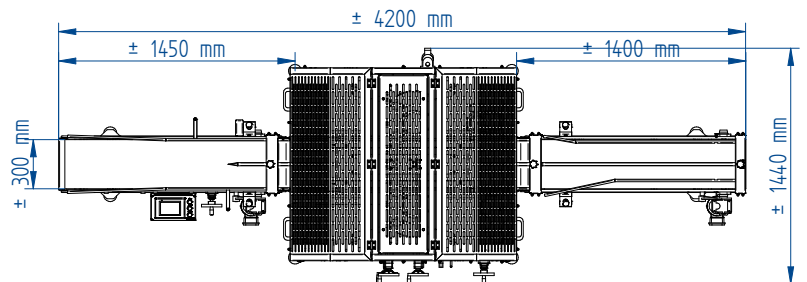

Circle blade

	buns, rolls or hot dog bread
	diameter: 80 – 120 mm height : 40 – 80 mm
